

WRAP YOURSELF IN SAVINGS

Treat yourself to your own gift this holiday season with some easy money-saving strategies. When decorating for the holidays, use LED lights. They're much better than regular lights because they use way less energy, saving you 90%. You can set timers or use smart plugs for your holiday lights so they are only on when you want them to be, saving even more. When you're not using your new electronics like computers, TVs, or chargers, it's a good idea to unplug them or use a smart power strip to do it for you. Even when these devices are turned off, they still use a small amount of electricity.
