

Notes

1. Manufactured alternatives approved and listed on the department's erosion control product acceptability list may be substituted.
2. When removing or maintaining inlet protection, care shall be taken so that the sediment trapped on the geotextile fabric does not fall into the inlet. Any material falling into the inlet shall be removed immediately.
3. Type A shall be utilized around unpaved areas and inlets until permanent stabilization.
4. Inlet protection shall be inspected weekly (at a minimum) and within 24 hours after each rain event of 0.5 inches or greater. Inlet protection shall be maintained or replaced at the direction of the city.
5. For more information see WDNR Tech Std #1060.
