

PUBLIC HEALTH ADVISORY ORDER RESTRICTING PUBLIC GATHERINGS SIZES

November 20, 2020, Revised January 26, 2021

This advisory was originally released on November 20, 2020. This advisory is revised to be extended to February 28, 2021 and to allow greater capacity in facilities that may host public gatherings. Pierce County has experienced a promising downward trend in cases since a peak in mid-November, but the county is still classified by the WI Department of Health Services as having a “very high” level of disease activity. Pierce County is currently hovering between the Harvard Model’s Accelerated Spread (Orange) and Tipping Point (Red) levels of disease. Two vaccines are currently available under emergency use authorization, but supply is limited. It is important that the Pierce County residents remain vigilant and continue to adhere to prevention measures while Pierce County Public Health and local healthcare organizations work diligently to vaccinate priority populations.

This advisory is not intended to be independently enforceable. However, because of the level of disease in our community and surrounding communities, credible complaints for violation of this advisory order will be taken by law enforcement agencies and investigated by Pierce County Public Health. This advisory shall be in place until February 28th, upon which time it will be reviewed by the Health Officer to determine if it can be continued, modified or discontinued.

WHEREAS, Pierce County in Wisconsin is in the midst of a pandemic and continues to sustain high levels of disease in the community, though the county has experienced a promising downward trend in newly identified cases. On January 26th, Pierce County had a rolling 7-day average daily case rate (35.4 cases/100,000 population) that is higher than the “critical” threshold rate established by the Harvard Global Health Institute (<https://globalepidemics.org/key-metrics-for-covid-suppression/>) and is higher than the WI state average (33.7 cases per 100,000 population); and

WHEREAS, through the contact tracing and reporting, Public Health agencies have identified characteristics of establishments and locations as being particularly susceptible to the spread of COVID-19; and

WHEREAS, establishments and locations particularly susceptible to the spread of COVID-19 are those with the following characteristics: places where multiple households gather in crowded spaces, in close proximity with one another, where people spend more than brief periods of time (15 minutes), or in poorly ventilated spaces, and/or where individuals engage in activities that increase viral particles in the air such as loud speaking, shouting, singing, or physical exertion; and

OUR MISSION

To promote healthy behaviors, prevent disease and injury, and protect against environmental hazards

WEREAS, two vaccines for COVID-19 have been approved by the FDA for emergency use authorization, but supply is limited nationally, two doses are required weeks apart for the vaccine to be fully effective, and it will take months to vaccinate priority populations, such as healthcare workers, residents 65 years of age or older, school staff, fire fighters and law enforcement, and long-term care facility staff and residents; and

WHEREAS, without vaccine having been widely distributed to vulnerable populations, the most effective population-wide tools we have to slow the spread of the disease are to stay physically distanced as much as possible and wear a face covering when we cannot stay apart; and

WHEREAS, Pierce County long-term care facilities continue to experience outbreaks, though outbreaks have become less common compared to November and December as cases have decreased in our community; and

WHEREAS, 38 deaths are associated with COVID-19 in Pierce County, with eight of those having been identified since late December; and

WHEREAS, without measures to slow the spread of COVID-19, people in Pierce County will suffer from more unnecessary illness, vulnerability from an overwhelmed health care and public health systems, and insecurity from an unstable economy; and

WHEREAS, hospitals in the Twin Cities metro report less than 5% of Medical Surge beds and just over 5% of ICU beds were available on January 24th; and

WHEREAS, schools and families with young children are under strain due to student and staff cases and quarantines. As of January 25th, 67 cases have been identified among Pierce County school children this month alone; and

WHEREAS, based on information from the Centers for Disease Control and Prevention (CDC) and input from state and local public health officials and medical professionals, face coverings, physical distancing and limiting the size of mass gatherings is necessary to protect persons throughout the State of Wisconsin from COVID-19; and

WHEREAS, pursuant to Wis. Stat. § 252.03, the local health officer: (i) shall promptly take all measures necessary to prevent, suppress and control communicable diseases; (ii) may do what is reasonable and necessary for the prevention and suppression of disease; and (iii) may forbid public gatherings when deemed necessary to control outbreaks or epidemics; and

WHEREAS, the local health officer deems the issuance of this directive and the measures to be taken as set forth herein to be reasonable and necessary to prevent, suppress and control the spread of COVID-19 in Pierce County; and

OUR MISSION

To promote healthy behaviors, prevent disease and injury, and protect against environmental hazards

WHEREAS, pursuant to Wisconsin Administrative Code s. DHS 145.06(6) the local health officer has authority to “direct persons who own or supervise real or physical property..., which present a threat of transmission of any communicable disease...to do what is reasonable and necessary to abate the threat of transmission”; and

NOW, THEREFORE BE ADVISED, that while all ongoing health recommendations remain of significant importance to reduce the spread of COVID-19, the following health recommendations are critical to suppress the further spread of COVID-19 and by this Advisory Order and Directive are hereby imposed, effective February 1, 2021:

1. Definitions.

- a. **Public gathering** means an indoor event, convening, or collection of individuals, whether planned or spontaneous, that is open to the public and brings together people who are not part of the same household in a single room.
 - i. Places that are **open** to the **public** include, but are not limited to:
 1. Rooms within a business location, store, or facility that allow members of the public to enter.
 2. Ticketed events where tickets are available for free or for purchase by any individual or by any individual within a specific class of people.
 - ii. Places that are **not open to the public**, and therefore are not part of the definition of a public gathering and are not limited by this order, include, but are not limited to:
 1. Office spaces, manufacturing plant, and other facilities that are accessible only by employees or other authorized personnel.
 2. Invitation-only events that exclude uninvited guests.
 3. Private residences. Except, a residence is considered open to the public during an event that allows entrance to any individual.

2. Public gatherings limited.

- a. Public gatherings are limited to no more than 50% of the total occupancy limits for the room or building, as established by the local municipality.
- b. For indoor spaces without an occupancy limit for the room or building that is established by the local municipality, such as a private residence, public gatherings are limited to no more than one person per 56 square feet in the room or building being utilized for the public gathering.¹
- c. The following are exempt from limitations on public gatherings:

¹ U.S. Fire Administration, [Understanding the Impacts of Social Distancing on Occupancy](#)

Enforcement and Applicability

This advisory is not intended to be independently enforceable. Pierce County will take complaints and investigate facilities violating the above guidelines. Violations of the health guidelines may result in enforcement under Wisconsin Administrative Code DHS s. 145.06(6) and/or Pierce County Ordinance Chapter 120.

This means that if, based on credible, clear and convincing evidence, the Pierce County Public Health Department’s investigation finds that a facility is violating the above guidelines, the Pierce County Public Health Department may issue a specific directive to the individual facility, providing an opportunity to correct or abate the violation.

If, based on credible evidence, the facility violates or does not comply with the specifics of the health directive issued to that individual facility, further enforcement under DHS s. 145.06(5) or Pierce County Ordinance Chapter 120 may be pursued in Court with the individual facility having the opportunity to respond and be heard.

Dated this 26th January 2021.
